**By Richard Bromley : Trace Fossils: Biology and Taphonomy (Special Topics in Paleontology)** Trace Fossils: Biology and Taphonomy (Special Topics in Paleontology):

This study of the sedimentary activity of trace making animals is intended as a course book for advanced students rather than a general introduction to ichnology Unlike most books on the subject which start with a geological approach this book starts with the organisms that create the structures that become trace fossils The text is arranged in two parts beginning with an examination of animal substrate relationships in a broad spectrum of different organisms and beh
