**By Jan Zalasiewicz : The Planet in a Pebble: A Journey into Earth's Deep History** to visualize a clear picture of the 12 th planets narrow figure 8 orbital trajectory around both suns the path has to be broken down into 8 segments eblm j0555 57ab is located about 600 light years from earth and its part of a unique and rather lopsided binary system

the tiny star was detected as it The Planet in a Pebble: A Journey into Earth's Deep History:

This is the story of a single pebble whose history carries us into abyssal depths of time and across the farthest reaches of space Indeed starting from this tiny common speck Jan Zalasiewicz offers readers a stimulating tour that begins with the Universe s dramatic birth in the unimaginable violence of the Big Bang and explores the construction of the Solar System and the origins of our own planet Zalasiewicz shows the almost incredible complexity present in the a
