By Natural History Museum, R. Harding, C Woodward : Gemstones (Earth) according to the western esoteric system all things in the nature are a combination of four elements fire earth air and water transparent gemstones are at quot;gem earthquot; our aim is to offer our customers an extensive selection of fine quality gemstones at affordable prices all our gems have been meticulously chosen Gemstones (Earth):

0 of 0 review helpful Overview of gemology By P LEFF The author does a pretty good job of generally educating the reader about the more common gems on the market today Photos are good and information is helpful BUT I would like to have seen more detailed information on how to spot fakes quickly and easily without carrying a whole laboratory on our backs There are so many crooks out there passing off fakes many from th When white light strikes and travels through a gem it gives the illusion of colour This book explores what else lies beneath the beauty of the gemstones seen in shop windows museums and jewellery It is designed for beginning geologists secondary students and general readers Aesthetically pleasing enjoyable accurate succinct One could say a gem among books of its kind New Scientist on the first edition About the Author Cally Oldershaw worked on the development of exhibitions in the
