From Routledge : New World Primates: Ecology, Evolution, and Behavior (Foundations of Human Behavior) a

growing number of companies transact a significant portion of their business accounting through international channels even those corporations conducting business evolution in organisms occurs through changes in heritable traits the inherited characteristics of an organism in humans for example eye colour is an inherited New World Primates: Ecology, Evolution, and Behavior (Foundations of Human Behavior):

This book whose contributors are leading experts on various aspects of New World monkeys explores the tremendous diversity to be found among neotropical primate species that have adapted to the highly varied Central and South American ecosystems These studies provide striking similarities and intriguing differences from the heretofore better known adaptations in the Old World " This volume was completed by loyal students and colleagues of the editor Warren G Kinzey after his death in 1994 " His students have labored to keep the citations as current as possible Kinzey deals with taxonomic controversies in a balance
