**By John Pickrell : Weird Dinosaurs: The Strange New Fossils Challenging Everything We Thought We Knew**  
during today's Kingsman the Golden Circle panel Fox premiered a new digital short a delightfully fun crossover where Kingsman's Eggsy Taron Egerton runs into people it took a long time to figure out that evolution happened and for many years western civilization relied largely on the Bible to understand how we got here **Weird Dinosaurs: The Strange New Fossils Challenging Everything We Thought We Knew:**

5 of 5 review helpful I would recommend anyone with an even passing interest in dinosaurs check this out By Physiux Dinosaurs are just a fun topic by themselves and thanks to the Jurassic movies they've become even more popular so I was very grateful to have found this book written with a very fluid writing style as that made it easier to share information with my kids We all loved this book especially as I From the outback of Australia to the Gobi Desert of Mongolia and the savanna of Madagascar the award-winning science writer and dinosaur enthusiast John Pickrell embarks on a world tour of new finds meeting the fossil hunters who work at the frontier of discovery He reveals the dwarf dinosaurs unearthed by an eccentric Transylvanian baron an aquatic crocodile snouted carnivore bigger than T rex that once lurked in North African waterways a Chinese dinosaur This history of the discovery of some of the most outlandish creatures that ever lived and the excitement of paleontological research will be sure to both entertain and instruct No other such historical narrative exists that is focused on weird extinct beasts
