reinterpreting the paleosalinity and water depth of peripheral foreland basin flysch roger higgs 30508 2017 ps kinematics and growth of supra salt systems click below to view list of the following compilations gc article originally in aapg explorer geophysical corner ps article originally presented as Fluid?Rock Interactions during Metamorphism (Advances in Physical Geochemistry):

The fifth volume in this series is focused on the chemical and physical interactions between rocks undergoing metamorphism and the fluids that they generate and that pass through them The recognition that such processes can profoundly affect the course of metamorphism has resulted in a number of recent papers and we consider that it is time for a review by some of the interested parties We hope our selection of contributors provides an adequate cross section and
