13 of 14 review helpful A book for Amber Inclusion Fans By K Maxwell This is only a small book of 73 pages It gives you a concise and well written account of how amber was formed and where in the world it is found The Baltic area is one of the more prolific locations but it is also found in places like Dominica and Burma It also provides information on fakes and how to test amber with practical instructions on how Amber is a remarkable substance that originates from the resin of trees that lived millions of years ago Anything that became trapped in this sticky resin was

fossilized and perfectly preserved The insects and other inclusions found in amber today are providing scientists with unique insights into the history of life on Earth In this new edition of Amber Andrew Ross provides an engaging overview of this prehistoric substance and its fossilized inclusions The book You might take this for a kid s book That would be a mistake Special are the children who care to know how to differentiate Baltic amber from Dominican amber or who delight in having a copy of the only known photograph of the extinct alder fly species Coryd
