environment and development and the steps centre hosted a Bats: A Community Perspective (Cambridge Studies in Ecology):

Extensive scientific study of bats suggests that they are long lived slowly reproducing animals adapted to relatively stable environments As such they might be expected to exist in communities heavily influenced by biotic interactions This book begins with an overview of bat biology including their systematic diversity and methodological problems in bat research This is followed by examples of local bat community surveys from the major biogeographic regions The evi This is a good book for professional community ecologists working on bats or interested in comparing their study species with bats The book is well produced The writing gets technical in places but it is otherwise clear and the summaries at the end of
