0 of 2 review helpful Five Stars By K D Kendig good product and service 13 of 14 review helpful A Book for the Rest of Us By David Fields Scientists love to write books for other scientists and overall deplore having to explain their science to the public Universities work overtime to close their walls to the general public even going as far as removing their fund In this fascinating exploration of the fossil record Niles Eldredge overturns the traditional view of evolution as a slow and inevitable process and he shows that lifeforms generally do not evolve to any significant degree until after massive extinction This rhythm of life a concept developed by Eldredge and Stephen Jay Gould known as punctuated equilibria in evolution is revealed by the fossilized remains of the earth s ancient flora and fauna

Distingui From Scientific American Eldredge has cleverly combined our knowledge of living organisms with instructive insights into the fossil record to convincingly argue that evolution is indeed the grand unifying idea of biology From
