3 of 3 review helpful My 13 year old boy loves this By Addicted I bought this book for my very curious and absorbs scientific type information like a sponge As a pediatric nurse I saw a boy the same age with this book and said I HAD

TO GET IT I gave the book only 4 stars due to the book I originally viewed was a larger in size hardback book I received a smaller size with same content in paperback version 4 of Starting with the Big Bang creation of the universe Bonewitz a geologist specializing in crystal chemistry with secondary training in archaeology per his New Age spiritually oriented Web site introduces types of rocks minerals gemstones and fossils to novice collectors The well illustrated guide published in conjunction with the Smithsonian Institution includes a glossary but no further reading or resources About the Author With more than 40 years experience as a geologist prospector and gem cutter Dr Ronald L Bonewitz provides a unique perspective on the subject
