**By Gary Greenberg, Carol Kiely, Kate Clover : The Secrets of Sand: A Journey into the Amazing Microscopic World of Sand** secrets of our living planet presented by chris packham bizarre relationships new science ten million species live on planet earth each one is incredible secrets beneath the ice pbs airdate december 28 2010 narrator its a mystery continent at the bottom of the world and the largest single mass of ice on earth The Secrets of Sand: A Journey into the Amazing Microscopic World of Sand:

0 of 0 review helpful That is one story of many hellip hellip a wonderful read By Stephan B We all of had sand in our

shoes dumped it out and probably did not think much about it Well here is a book that takes a close look hellip hellip hellip a very close look at that ubiquitous material sand Well written and informative I learned about the processes that make sand For example Florida sand is so uniform and From the beach to the moon explore the incredible hidden world of sand seen through a microscope To the naked eye the tiny particles that make up sand are less than inspiring Under the microscope however it s a completely different story Looking at sand under extreme magnification we quickly find ourselves immersed in a new world of brilliant colors organic shapes and the stunning patterns of nature Every grain of sand is a snap A stunning extra are images of the lunar dust particles that Kiely studies including glassy spherules from extinct fire fountain volcanoes Nature
