**By David Alderton : Rodents of the World** rodent control facts identification prevention and more scheduling a home inspection may help you get rid of rodents such as rats and mice learn more these diseases can be spread to humans directly through handling of live or dead rodents through contact with rodent feces urine or saliva and through rodent bites Rodents of the World:

4 of 4 review helpful Not a field guide but an interesting book about the big world of rodents By Timothy B Riley  
When you mention the subject of rodents people wrinkle up their noses and shudder a bit Because mankind has lived in close proximity to and has been plagued by mice and rats many people have strongly negative feelings about the entire order and some are even unaware that it includes diverse animals such as Rodents make up 40 of the mammal population the most significant single group Yet despite their numbers and adaptability some species may soon become extinct Over 100 color photos enhance this look at a variety of rodents including the common house mouse subterranean dwelling blind mole rat flying squirrel beaver and giant capybara
