**By James P. Fitzgerald, Carron A. Meaney, David Michael Armstrong : Mammals of Colorado** mammals include humans and all other animals that are warm blooded vertebrates vertebrates have backbones with hair they feed their young with milk and have a mammals are characterized as warm blooded body temperature is internally regulated and constant regardless of the external temperature animals whose skin is more Mammals of Colorado:

1 of 1 review helpful Range Maps By The Wildlife Biologist Anybody wanting the best information about Colorado mammals should start with this book I enjoyed that I could save money by buying a used book It had dirt on it and a few marks which are easily ignored The good features of the book are far too numerous to list My complaint with the book is with the range maps which are vital to the book The first thing Mammals of Colorado provides detailed

information on the identification ecology behavior reproduction taxonomy and distribution of the state mammals The first three chapters discuss Colorado's physiography and ecosystems the evolution anatomy and biogeography of mammals a history of their study in Colorado and the many different values that people hold in relation to mammals The remaining chapters provide accounts of species each including An excellent resource for anyone interested in Colorado mammals or wildlife in general Summing Up Highly Recommended — J L Hunt Choice
