By Jeff Ripple : Manatees and Dugongs of the World sirenians of the world q how many manatees are left in the world talia da yun pizer massachusetts a the best way to answer this question is to breakdown the the dugong d u dj u ; dugong dugon is a medium sized marine mammal it is one of four living species of the order sirenia which Manatees and Dugongs of the World:

6 of 6 review helpful Most comprehensive book for the public By AskDrCaryn As a manatee scientist and co founder of Sirenian International Inc I would rate this beautifully illustrated introduction to manatees and dugongs of the world

as the best choice for all reading levels at or above high school I have purchased the hardback edition and also sell the softcover edition in our giftshop Although the book has Manatees and Dugongs of the World is an excellent introduction to the natural history of the four living species of sirenian including the Florida and Antillean subspecies of the West Indian manatee the Amazonian manatee the West African manatee and the dugong as well as the extinct Stellar's Sea Cow Also included is a discussion of conservation issues and an exploration of the sirenian in myth and tradition com The sirenians as scientists call them are familiar denizens of the world's subtropical waters well known to visitors to the Red Sea the Florida keys and Australia In ancient times around the world these creatures the manatees and dugongs were th
