THE GRAVITY THEORY OF MASS EXTINCTION: A new unified theory of mass extinction explains the rise and fall of the dinosaurs:

The belief that some dinosaurs were so gigantic that they couldn't exist with today's gravity is a topic frequently discussed on internet websites. The opinion posted the most is that the Earth's mass must have changed significantly resulting in an alteration of surface gravity or that the Earth somehow expanded. Neither of these opinions have scientific support. The theory explained in this book, the GTME, does have that support. Readers familiar with basic rotati From the Author CONTENTS INTRODUCTION Prior to the 1980s dinosaur extinction was a subject that received only modest attention from the paleontological community. After all, it was believed that dinosaurs like any other living species would prosper for some
