**By Bob Lynch : Agates of Lake Superior: Stunning Varieties and How They Are Formed** 55 lake street oceana walk cairns 4870 qld phone 07 4000 0193 email cairnscrystalcavesau amazonite is a rare blue green variety of microcline and is a mineral of limited occurrence a semi opaque stone that was used extensively by the egyptians it is Agates of Lake Superior: Stunning Varieties and How They Are Formed:

1 of 1 review helpful Pix Pix and More Pix By Eileen E Freeman This is a particularly beautiful book with a great many photos of the different types of fortification and other agates that characterize Lake Superior agates The text is

also interesting and contains more every day writing than geological manuals do A friend of mine who was visiting saw it on a table and before I could tell her about it she has picked The definitive book on Lake Superior s agates is here If you re a casual rock collector you will find Agates of Lake Superior fun interesting and beautiful If you re a more advanced hobbyist you will appreciate this professional and scientific resource The book provides a thorough examination of Lake Superior s strange and unique agate varieties as well as a critical look at agate formation theories tips on how to find and identify agates where to look for
