By W. Dan Hausel : A Guide to Finding Gemstones, Gold, Minerals & Rocks port manteaux churns out silly new words when you feed it an idea or two enter a word or two above and youll get back a bunch of portmanteaux created by jamming search metadata search full text of books search tv captions search archived web sites advanced search A Guide to Finding Gemstones, Gold, Minerals & Rocks:

18 of 18 review helpful Good book worth the price if you don't have his others Great gemstone geology reference By Peter Welty I'm going to start by saying that if you have bought Dr Hausel's books in the past this one is too worth buying but if you have NOT bought his other books start here A large amount of the information is repeated it appears to be edited somewhat and in most cases additional information Follow in the footsteps of successful gem and gold hunters and search the hills for rough diamonds colored gemstones lapidary minerals precious metals and interesting minerals and rocks Written for the geoscientist prospector and rockhound the first part of the book focuses on physical characteristics of gems and minerals This is supplemented with the second part of the book that describes dozens upon dozens of colored gem diamond gold mineral and rock localities About the Author W Dan Hausel graduated from the University of Utah with geology degrees in 1972 and 1974 He worked as the Senior Economic Geologist for the Wyoming Geological Survey at the University of Wyoming geological consultant for several mining companies
