Guides (Reed New Holland)):

Australia's gemstones and minerals are a treasure chest of world renown. This guide describes Australia's common minerals and gems, some rarities, and the odd curiosity. It will enable collectors to identify a wide range of specimens. Part 1 introduces readers to gems and minerals and their chemical and crystal systems. It also gives tips on recognizing and valuing specimens. Part 2 features 288 superb color photographs to accompany each gem or mineral entry. The entries. About the Author: Gayle Webb is a gemologist at the Australian Museum and Lin Sutherland is the Principal Research Scientist in Mineralogy and Petrology at the Museum.
